

Introduction to ERP Studio

ERP Studio is a unique product to help small and medium-size businesses understanding where and how to cut the cost, to streamline the core business operations, make decisions and manage the entire operations.

The software gives advantage and control when interacting with suppliers and business partners, with customers and employees.

The product is designed with major advantages specifically oriented for small business owners:

- The software offers functionalities that are currently only available to large companies that can invest significant amount of money in the technology.
- The product eliminates the frequent situation when the business cannot use functionalities because they are too complicated, require too much time to learn and it is not clear how and when it will help.
- ERP Studio has a clear workflow that is easy to learn and to use. What is important, it is easy to make adjustments when the business changes, grows or there is a need to gather and to work with unique to the particular business information.
- All important information is available immediately for analysis.
- The price options are designed for small business considering the current business environment.

ERP Studio is a great tool for services, clinics, store, wholesale distributors and manufacturers. It offers inventory control, customer and supplier management, sales, accounting, manufacturing, front-store operations, scheduling, web presence and e-commerce.
